Strain Theory and the American Society for Criminology Anomie and Strain Theories of Crime ~~A General Theory Of Crime~~

A general theory of crime. By articulating a general theory of crime and related behavior, the authors present a new and comprehensive statement of what the criminological enterprise should be about. They argue that prevalent academic criminology—whether sociological, psychological, biological, or economic—has been unable to provide believable explanations of criminal behavior.

~~A general theory of crime:~~

A general theory of crime hypothesizes that low self-control is the cause of the propensity toward criminal behavior. Specifically, in regard to the theory 's testability, Gottfredson and Hirschi do not define self-control separately from this propensity.

According to their theory, an individual can only be prevented from the tendency to commit crime. The theory implies that once a person engages in deviant behavior, whether one time or habitually, he or she cannot be deterred from it. This concept suggests the irrational belief that anyone who commits a crime is destined to always commit crime.

The self-control theory of crime, often referred to as the general theory of crime, is a criminological theory about the lack of individual self-control as the main factor behind criminal behavior. The self-control theory of crime suggests that individuals who were ineffectually parented before the age of ten develop less self-control than individuals of approximately the same age who were raised with better parenting.
