In Anarchist ' s Guide to Historic House Museums, Vagnone and Ryan provide 160 questions to help museum managers evaluate their historic houses. The questions pertain to the relationship between the museum and surrounding community, fact-based narratives versus emotional experiences, etc. Emotional experiences are important for historic house museums because visitors should feel a personal connection to the history and see the life that the former residents lived.

This book offers a step-by-step guide to historic house museums to make them more informative and sustainable through an inclusive, visitor-centered paradigm of the shared experience of human habitation.

In these days of an aging traditional audience, shrinking attendance, tightened budgets, increased competition, and exponential growth in new types of communication methods, America ' s house museums need to take bold steps and expand their overall purpose beyond those of the traditional museum. They need not only to engage the communities surrounding them, but also to collaborate with visitors on the type and quality of experience they provide. This book is a groundbreaking manifesto that calls for the establishment of a more inclusive, visitor-centered paradigm based on the shared experience of human habitation. It draws inspiration from film, theater, public art, and urban design to transform historic house museums while providing a how-to guide for making historic house museums sustainable, through five primary themes: communicating with the surrounding community, engaging the community, re-imagining the visitor experience, celebrating the detritus of human habitation, and acknowledging the illusion of the shelter ' s authenticity. Anarchist's Guide to Historic House Museums offers a wry, but informed, rule-breaking perspective from authors with years of experience and gives numerous vivid examples of both good and not-so-good practices from house museums in the U.S.

In these days of an aging traditional audience, shrinking attendance, tightened budgets, increased competition, and exponential growth in new types of communication methods, America ' s house museums need to take bold steps and expand their overall purpose beyond those of the traditional museum. They need not only to engage the communities surrounding them, but also to collaborate with visitors on the type and quality of experience they provide. This book is a groundbreaking manifesto that calls for the establishment of a more inclusive, visitor-centered paradigm based on the shared experience of human habitation. Respected museum professionals discuss contemporary issues and successful programs, and offer practical guidelines and information, up-to-date references, and lively illustrations in this wide-ranging volume. Interpreting Historic House Museums captures the big picture and important details. Its scope and accessibility will make it useful and relevant for both students and practicing professionals.

A generational shift is occurring at historic house museums as board members and volunteers retire while few young people

step forward to take their place. These landmarks are also plagued by serious deferred maintenance, and many have no endowment funds. What will happen to these sites in the next ten years, and what can be done to assure their continued preservation for generations to come? In *New Solutions for House Museums* Harris examines possible options and provides a decision-making methodology as well as a dozen case studies of house museums that have made a successful transition to a new owner or user.

Historic house museums can be found in nearly every city in the United States and Canada. These are the homes of the earliest settlers, statesmen, frontiersmen, great writers, artists, architects, and industrial magnates. These are the places, carefully saved and preserved, that represent a cultural heritage. Despite their popularity, it is not uncommon to find museums that are in poor repair, their collections neglected and their staffs grossly overworked. Many are run by well-meaning and hard-working volunteers who have little or no professional training. Often they survive on shoestring budgets and are able to present only limited programs. Serving both as a hands-on guide and reference, this book examines these problems, offering practical advice and solutions which can be easily implemented. Its useful "lessons" include governance, where to find help, care of collections, conservation, security, and interpretation--all designed to increase the professionalism of the historic house museum.

Celebrating the lives of famous men and women, historic house museums showcase restored rooms and period furnishings, and portray in detail their former occupants' daily lives. But behind the gilded molding and curtain brocade lie the largely unknown, politically charged stories of how the homes were first established as museums. Focusing on George Washington's Mount Vernon, Louisa May Alcott's Orchard House, Thomas Jefferson's Monticello, and the Booker T. Washington National Monument, Patricia West shows how historic houses reflect less the lives and times of their famous inhabitants than the political pressures of the eras during which they were transformed into museums.

The *Anarchist Cookbook* will shock, it will disturb, it will provoke. It places in historical perspective an era when "Turn on, Burn down, Blow up" are revolutionary slogans of the day. Says the author "This book... is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There is detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.

Creating tours, school programs, and other interpretive activities at historic house museums are among the most effective ways to engage the public in the history of their community and yet many organizations fail to achieve their potential. This guide describes the essential elements of successful interpretation: content, audience, and methods.
