How to make sound investment decisions: Based on a continuing case study this comprehensive analysis paces a sure way through the variety of investment appraisal methods. The companion text 'Grundlagen der Investitionsrechnung: Eine Darstellung anhand einer Fallstudie' is available in German.

" What are the best investments for me? " ... " What about risk? " ... " Do I need professional help with my investments and can I afford it? "

Mastering the language, concepts, vehicles and strategies of investing can be challenging. Fundamentals of Investing shows how to make informed investment decisions, understand the risks inherent in investing and how to confidently shape a sound investment strategy. Fundamentals of Investing 3rd edition is completely updated and introduces core concepts and tools used by Australian investors, providing a firm understanding of the fundamental principles of investments. Focusing on both individual securities and portfolios, students learn how to develop, implement and monitor investment goals after considering the risk and return of both markets and investment vehicles. Fundamentals of Investing is suitable for introductory investments courses offered at university undergraduate or post-graduate level, as well as colleges, professional certification programs and continuing education courses.

Valuation is a topic that is extensively covered in business degree programs throughout the country. Damodaran's revisions to "Investment Valuation" are an addition to the needs of these programs.

Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need when they need it and how they need it so that your class time is more engaging and effective.

Businesses promote their environmental awareness through green buildings, eco-labels, sustainability reports, industry pledges and clean technologies. When are these symbols wasteful corporate spin, and when do they signal authentic environmental improvements? Based on twenty years of research, three rich case studies, a strong theoretical model and a range of practical applications, this book provides the first systematic analysis of the drivers and consequences of symbolic corporate environmentalism. It addresses the indirect cost of companies' symbolic actions and develops a new concept of the 'social energy penalty' - the cost to society when powerful corporate actors limit the social conversation on environmental problems and their solutions. This thoughtful book develops a set of tools for researchers, regulators and managers to separate useful environmental information from empty corporate spin, and will appeal to researchers and students of corporate responsibility, corporate environmental strategy and sustainable business, as well as environmental practitioners.

The fully revised and updated version of the leading textbook on real estate investment, emphasising real estate cycles and the availability and flow of global capital Real Estate Investment remains the most influential textbook on the subject, used in top-tier colleges and universities worldwide. Its unique, practical perspective on international real estate investment focusses on real-world techniques which measure, benchmark, forecast and manage property investments as an asset class. The text examines global property markets and real estate cycles, outlines market fundamentals and explains asset pricing and portfolio theory in the context of real estate. In the years since the text 's first publication, conditions in global real estate markets have changed considerably following the financial crisis of 2008-2009. Real estate asset prices have increased past pre-crisis levels, signalling a general market recovery. Previously scarce debt and equity capital is now abundant, while many institutions once averse to acquiring property are re-entering the markets. The latest edition – extensively revised and updated to address current market trends and practices as well as reflect feedback from instructors and students – features new content on real estate development, improved practical examples, expanded case studies and more. This seminal textbook: Emphasises practical solutions to real investing problems rather than complex theory Offers substantial new and revised content throughout the text Covers topics such as valuation, leasing, mortgages, real estate funds, underwriting and private and public equity real estate Features up-to-date sections on performance measurement, real estate debt markets and building and managing real estate portfolios Includes access to a re-designed companion website containing numerous problems and solutions, presentation slides and additional instructor and student resources Written by internationally-recognised experts in capital management and institutional property investing strategies, Real Estate Investment, Second Edition: Strategies, Structures, Decisions is an indispensable textbook for instructors and students of real estate fund management, investment management and investment banking, as well as a valuable reference text for analysts, researchers, investment managers, investment bankers and asset managers.

Principles of Corporate Finance is the worldwide leading text that describes the theory and practice of corporate finance. Throughout the book, the authors show how managers use financial theory to solve practical problems and as a way to respond to change by showing not just how, but why companies and management act as they do. This text is a valued reference for thousands of practicing financial managers.
