Forever Mates: Stefan & Bay [Siren Everlasting Classic ManLove: Erotic Alternative Paranormal Romance, M/M, shape-shifters, HEA] The joy Stefan felt upon finding his forever mate was overshadowed by the sorrow that filled him at his mate's rejection. Bay wanted nothing to do with him. Being the shy one in his family, Stefan's lack of social skills left him confused as to how to bridge the gap between them. Bay Stanton knew he had found the sexiest man he'd ever seen the second he laid eyes on Stefan. It was just too bad that his personality didn't match, or so Bay believes when Stefan lies to him, a sin Bay finds nearly impossible to forgive. As difficult as it is for them both, when trouble threatens their mating, can they depend on each other or will the lies and misunderstandings be bigger than the danger? ** Forever Mates: Yuri & Liam [Siren Everlasting Classic ManLove: Erotic Alternative Paranormal Romance, M/M, shape-shifters, HEA] Yuri knows he has been truly blessed by fate when he gets his first sight of his forever mate. He just can't seem to resist Mikhail, not even when the man shifts in front of him and Jace learns that he has been rated against his will. Deciding whether to believe the sexy alpha when he says it was instinctual might be harder than staying alive when others in Mikhail's pride take exception to him mating a human. In summer and fall 1941, as German armies advanced with shocking speed across the Soviet Union, the Soviet leadership embarked on a desperate attempt to safeguard the country's industrial and human resources. Their success helped determine the outcome of the war in Europe. To the Tashkent Station brilliantly reconstructs the evacuation of over sixteen million Soviet civilians in one of the most dramatic episodes of World War II. Rebecca Manley paints a vivid picture of this epic wartime saga: the chaos that erupted in towns large and small as German troops approached, the overcrowded trains that trundled eastward, and the desperate search for sustenance and shelter in Tashkent, one of the most sought-after sites of refuge in the rear. Her story ends in the shadow of victory, as evacuees journeyed back to their ruined cities and broken homes. Based on previously unexploited archival collections in Russia, Ukraine, and Uzbekistan, To the Tashkent Station offers a novel look at a war that transformed the lives of several generations of Soviet citizens. The evacuation touched men, women, and children from all walks of life: writers as well as workers, scientists along with government officials, party bosses, and peasants. Manley weaves their harrowing stories into a probing analysis of how the Soviet Union responded to and was transformed by World War II. Over the course of the war, the Soviet state was challenged as never before. Popular loyalties were tested, social hierarchies were recast, and the multiethnic fabric of the country was subjected to new strains. Even as the evacuation saved countless Soviet Jews from almost certain death, it spawned a new and virulent wave of anti-Semitism. This magisterial work is the first in-depth study of this crucial but neglected episode in the history of twentieth-century population displacement, World War II, and the Soviet Union.

In 2008, the iconic doomsday clock of the Bulletin of the Atomic Scientists was set at five minutes to midnight—two minutes closer to Armageddon than in 1962, when John F. Kennedy and Nikita Khrushchev went eyeball to eyeball over missiles in Cuba! We still live in an echo chamber of fear, after eight years in which the Bush administration and its harshest critics reinforced each other's worst fears about the Bomb. And yet, there have been no mushroom clouds or acts of nuclear terrorism since the Soviet Union dissolved, let alone since 9/11. Our worst fears still could be realized at any time, but Michael Krepon argues that the United States has never possessed more tools and capacity to reduce nuclear dangers than it does today - from containment and deterrence to diplomacy, military strength, and arms control. The bloated nuclear arsenals of the Cold War years have been greatly reduced, nuclear weapon testing has almost ended, and all but eight countries have pledged not to acquire the Bomb. Major powers have less use for the Bomb than at any time in the past. Thus, despite wars, crises, and Murphy's Law, the dark shadows cast by nuclear weapons can continue to recede. Krepon believes that positive trends can continue, even in the face of the twin threats of nuclear terrorism and proliferation that have been exacerbated by the Bush administration's pursuit of a war of choice in Iraq based on false assumptions. Krepon advocates a "back to basics" approach to reducing nuclear dangers, reversing the Bush administration's denigration of diplomacy, deterrence, containment, and arms control. As he sees it, "The United States has stumbled before, but America has also made it through hard times and rebounded. With wisdom, persistence, and luck, another dark passage can be successfully navigated."

In this groundbreaking book David Roberts sets out to demonstrate the centrality of the total work of art to European modernism since the French Revolution. The total work of art is usually understood as the intention to reunite the arts into the one integrated whole, but it is also tied from the beginning to the desire to recover and renew the public function of art. The synthesis of the arts in the service of social and cultural regeneration was a particularly German dream, which made Wagner and Nietzsche the other center of aesthetic modernism alongside Baudelaire and Mallarmé. The history and theory of the total work of art pose a whole series of questions not only to aesthetic modernism and its utopias but also to the whole epoch from the French Revolution to the totalitarian revolutions of the twentieth century. The total work of art indicates the need to revisit key assumptions of modernism, such as the foregrounding of the autonomy and separation of the arts at the expense of the counterdependencies to the reunion of the arts, and cuts across the neat equation of avant-gardism with progress and deconstructs the familiar left-right divide between revolution and reaction, the modern and the antimodern. Situated at the interface between art, religion, and politics, the total work of art invites us to rethink the relationship between art and religion and art and politics in European modernism. In a major departure from the existing literature David Roberts argues for twin lineages of the total work, a French revolutionary and a German aesthetic, which interrelate across the whole epoch of European modernism, culminating in the aesthetic and political radicalism of the avant-garde movements in response to the crisis of autonomous art and the accelerating political crisis of European societies from the 1890s forward.

In this bold new perspective on the United States-China power transition, Paul K. MacDonald and Joseph M. Parent examine all great power transitions since 1870. They find that declining and rising powers have strong incentives to moderate their behavior at moments when the hierarchy of great powers is shifting. How do great powers respond to decline? they ask. What options do great powers have to slow or reverse their descent? In Twilight of the Titans, MacDonald and Parent challenge claims that policymakers for great powers, unwilling to manage decline through moderation, will be pushed to extreme measures. Tough talk, intimidation, provocation, and preventive war, they write, are not the only alternatives to defeat. Surprisingly, retrenchment tends not to make declining states tempting prey for other states nor does it promote domestic dysfunction. What retrenchment does encourage is resurrection. Only states that retrench have recovered their former position. MacDonald and Parent show how declining states tend to behave, what policy options they have to choose from, how rising states respond to decline, and what conditions reward which strategies. Using case studies that include Great Britain in 1872 and 1908, Russia in 1888 and 1903, and France in 1893 and 1924, Twilight of the Titans offers clear evidence that declining powers have a wide array of options at their disposal and offers guidance on how to use the right tools at the right time. The result is a comprehensive rethinking of power transition and hegemonic war theories and a different approach to the policy problems that declining states face. What matters most, the authors write, is the strategic choices made by the great powers.
