With its emphasis on real world, manager-oriented applications, this text shows students how managers apply theories and techniques to analyse and solve real-world business problems.

The book provides a collection of individual chapters from the participants in the OEP1 project, which represent a mix of academic and practical chapters and contributions. The first part of the book is dedicated to a theoretical introduction to Organisations' Environmental Performance Indicators and to a state-of-the-art overview in literature and practice. The second part of the book contains several chapters describing information systems and their components supporting the management of Environmental Performance Indicators, especially in inter-organizational contexts. The third part is dedicated to three case studies from practice, and the book concludes with part four, in which practical guidelines for the innovative management of Environmental Performance indicators in organizations and in inter-organizational contexts are presented.

This title includes a number of Open Access chapters. This compendium volume, Urban Land Use: Community-Based Planning, covers a range of land use planning and community engagement issues. Part I explores the connections between land use decisions and consequences for urban residents, particularly in the areas of health and health equity. The chapters in Part II provide a closer look at community land use planning practice in several case studies. Part III offers several practical and innovative tools for integrating community decisions into land use planning. Land use decisions are often an invisible part of urban communities across the globe. However, their effects are anything but invisible. Urban land use patterns directly impact residents, and do so unequally across segments of the population based on income and race. Fortunately, land use planners are increasingly recognizing the need for meaningful and skillful community engagement strategies in order to rectify the consequences of historical land use decisions, and to build healthier, stronger future communities through responsive land use planning. The editor carefully selected each chapter individually to provide a nuanced look at community-based urban land use planning. The chapters included cover a wide variety of issues, including the relationship between land use decisions, resulting environmental conditions, and unequal health consequences for residents the substantial co-benefits of land designed for physical activity, including physical and mental health, social benefits, safety, sustainability, and economics urban health equity indicators to identify problems with the built environment and move cities toward better management of resources to create healthy communities how new media forms allow citizens to engage with and affect the built form of their communities. ways in which community organizations in low-income neighborhoods can be effective in working with city planning services that have few resources a GIS-based collaborative decision tool to make land use decisions regarding vacant land redevelopment interactive community planning that incorporates multiple stakeholders with the goal of economically stimulating, conserving ecosystems, and meeting social needs community land trusts as a way to democratically determine land use Taken as a whole, these chapters are a basis for furthering effective community input processes in urban planning. Together, planners and community members can make cities work better for all residents.

A painted sword is their only protection from evil sorcery, strange creatures, and enemy forces. On the spell-crossed Phaer Isle, teenage Xemion dreams of being a great swordsman. When he finds a blade-shaped stick, he fashions it to look like a real sword. Knowing that the laws of their cruel Pathan conquerors would require a death sentence for possession of such an object, his friend Saheli demands he destroy it. He agrees, but insists on performing just one sword ceremony. When his mastery of the weapon, a skill long forgotten, is witnessed by a mysterious man named Vallaine, the two friends are invited to join a planned rebellion. At first they refuse, but when a sadistic official discovers their transgressions, they are forced to flee their home and embark on a dangerous journey to the ruins of the ancient city of Ulde, where rebel forces are gathering. Armed with only their wits and the painted sword, they face Thralls, Triplicants, dragons, rage-wraiths, and a host of other spell-crossed beings. As they approach the Great Kone, source of all spell-craft, Saheli's fear of magic and Xemion's attraction to it bind them in a crossed spell of their own \u2022 one that threatens to separate the two forever.
