3 or 4 months ago I ran across a web site that had a bunch of Kubota (possibly other brands as well, can't remember) manuals in PDF format for free download. These were parts manuals, owners manuals and maybe even some service manuals. I grabbed a few at the time, but now for the life of me I cannot find it again. Does anyone happen to have a bookmark for such a site?

America's colleges and universities are the best in the world. They are also the most expensive. Tuition has risen faster than the rate of inflation for the past thirty years. There is no indication that this trend will abate. Ronald G. Ehrenberg explores the causes of this tuition inflation, drawing on his many years as a teacher and researcher of the economics of higher education and as a senior administrator at Cornell University. Using incidents and examples from his own experience, he discusses a wide range of topics including endowment policies, admissions and financial aid policies, the funding of research, tenure and the end of mandatory retirement, information technology, libraries and distance learning, student housing, and intercollegiate athletics. He shows that colleges and universities, having multiple, relatively independent constituencies, suffer from ineffective central control of their costs. And in a fascinating analysis of their response to the ratings published by magazines such as "U.S. News & World Report," he shows how they engage in a dysfunctional competition for students. In the short run, colleges and universities have little need to worry about rising tuitions, since the number of qualified students applying for entrance is rising even faster. But in the long run, it is not at all clear that the increases can be sustained. Ehrenberg concludes by proposing a set of policies to slow the institutions' rising tuitions without damaging their quality.

Too often monetary economics has been taught as a collection of facts about institutions for students to memorize. By teaching from first principles instead, this advanced undergraduate textbook builds on a simple, clear monetary model and applies this framework consistently to a wide variety of monetary questions. Starting with the case in which trade is mutually beneficial, the book demonstrates that money makes people better off, and that government money competes against other means of payments, including other types of government money. After developing each of these topics, the book tackles the issue of money competing against other stores of value, examining issues associated with trade, finance, and modern banking. The book then moves from simple economies to modern economies, addressing the role banks play in making more trades possible, concluding with the information problems plaguing modern banking, which result in financial crises.

For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack—but far more fun to discover, as all of these delightful stories make abundantly clear.
