A bestselling calculations handbook that offers electric power engineers and technicians essential, step-by-step procedures for solving a wide array of electric power problems. This edition introduces a complete electronic book on CD-ROM with over 100 live calculations--90% of the book's calculations. Updated to reflect the new National Electric Code advances in transformer and motors; and the new system design and operating procedures in the electric utility industry prompted by deregulation.

Poznan, Poland was selected as the site of the third annual workshop on this topic to coincide with the Software Engineering Education Symposium (SEES'98), and also to establish an international presence in Central Europe "although we are not an event on the scale of olympic games." Twenty-six participants (pictured) present papers related to: real-time systems programs and curricula, teaching RT systems design and verification, components of RT labs, RT systems in control engineering education and in other disciplines. Also includes invited talks on RT devices at practical prices and the essentials of RT education. For the uninitiated, IEEE stands for the Institute of Electrical and Electronic Engineers.
