This title is appropriate for all baccalaureate-level courses in critical

care and advanced adult or medical surgical nursing, as well as for hospital orientation programs for beginning critical care nurses. An introduction to critical care that helps nurses deliver safe, effective care that optimizes patients' outcome Understanding the Essentials of Critical Care Nursing provides novice critical care nurses with a firm foundation so that they are able to understand the complexities of care; deliver safe, effective care; and begin their transition to expert nurses. It identifies concepts and techniques that are unique to critical care nursing and focuses on the essentials of providing care to patients with disorders that are commonly seen in critical care settings. Evidence-based practices, safety initiatives, commonly used medications, and leading technologies for providing better care are highlighted throughout the book. The Third Edition includes current recommendations for practice as well as new NCLEX-style questions and analytical Why/Why Not features that spark critical thinking and test readers' understanding. By concentrating on the problems that the new critical care nurse is most likely to encounter, the text establishes the groundwork students need to become increasingly effective nurses capable of offering advanced care.

For all undergraduate- and graduate-level courses across the Nursing curriculum, especially clinical courses. This easy-to-use guide gives students instant access to information needed to write thorough, individualized care plans based on the most recent NANDA-approved nursing diagnoses. Nursing Interventions Classifications (NIC) and Nursing Outcome Classifications (NOC) are incorporated throughout. The guide presents diagnoses associated with medical, surgical, psychiatric, perinatal, and pediatric patient populations. Each Plan of Care includes: definition of nursing diagnosis, defining characteristics, related factors, suggestions for use, suggested alternative diagnoses, expected outcomes and evaluation criteria, NIC/NOC taxonomy, and suggested nursing actions.

For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care Child Health Nursing: Partnering with Children & Families promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community. It focuses on the importance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is

affected by reforms to healthcare and its delivery—such as electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020. A supplement for a variety of junior/senior-level courses in Critical Care or Advanced Med-Surg Nursing courses and others throughout the nursing curriculum. Written by practicing nurses in acute care, this text provides students with a basic understanding of complex patients and the ability to provide nursing care across a variety of settings by using a series of reality-based, self-paced, self-contained modules that focus on multiple system problems frequently encountered in working with high acuity patients. Using a "nuts and bolts" approach, it addresses essentials by using examples, analogies, and metaphors; focuses on concepts and principles that

can be applied across practice settings and patient populations; and includes nursing diagnoses. The modules progress from simple to complex and contain pretests and posttests with answers, learning objectives, glossary, abbreviations, and review questions and answers.
