The Iron Ring

The Iron Ring is a ring worn by many Canadian-trained engineers, as a symbol and reminder of the obligations and ethics associated with their profession. The ring is presented to engineering graduates in a private ceremony known as the Ritual of the Calling of an Engineer. The concept of the ritual and its Iron Rings originated from H. E. T. Haultain in 1922, with assistance from Rudyard Kipling, who crafted the ritual at Haultain's request.

Iron Ring - Wikipedia

The Iron Ring (1997) is a fantasy novel for children by Lloyd Alexander. It features a young king Tamar who leaves Sundari Palace on a quest journey in a land of humans and talking animals, which are inspired by Indian mythology. The caste system of India is one ground for conflict in the novel and names are strongly Hindi.

The Iron Ring - Wikipedia

"The Iron Ring," by Lloyd Alexander, is a self-contained story (as opposed to series) rooted in Indian mythology and folklore. As with "The Remarkable Journey of Prince Jen" and The Prydain Chronicles, Alexander has done research into the mythology and folklore (in a time when that sort of research was harder to do), and the novel follows a very specific progression.

The Iron Ring was founded in 1363 DR in Skullport by two powerful slavers (who happened to hate each other), the yuan-ti abomination Zstulkk Ssarmn and the priest of Loviatar Quinan Varnaed. The alliance was very profitable and grew quickly until in less than ten years' time it came to control most of the slave trafficking in Skullport and Undermountain.

that became known as Taaffe's Iron Ring. His greatest success was the restoration of a modicum of order by granting concessions to the nationalist aspirations of Poles and Czechs and bringing them into the Habsburg civil service. The demands of the Czech nationalists became increasingly radical, however, and Taaffe finally [Read More](#)

The Iron Ring. The idea of a ceremony for the Obligation of Canadian Engineers dates back to 1922, when seven past-presidents of the Engineering Institute of Canada attended a meeting in Montreal with other engineers. Rudyard Kipling responded to a call from the seven engineers with The Ritual of the Calling of an Engineer, to be administered by the Corporation of the Seven Wardens Inc.

The Iron Ring

A typical Iron Ring. As some people know, Canadian engineers usually choose to wear an Iron Ring, as illustrated in the picture, on the small finger of their "working" hand. Actually, it's now usually stainless steel, and so about 72% iron, 18% chromium, 8% nickel and some other elements. It is

insult to injury, his mysterious rescuer took it upon himself to affix Tyvian with an iron ring that prevents the wearer from any evildoing. Revenge just got complicated. On his quest to get even, Tyvian navigates dark international conspiracies, dodges midnight assassins, and uncovers the plans of the ruthless warlord Banric Sahand—all while running from a Mage-Defender determined to lock him up. Tyvian will need to use every dirty trick in the book to avoid a painful and ignominious end, even as he discovers that sometimes even the world's most devious man needs a shoulder to lean on.

After he loses his kingdom and everything he owns in a dice game, Tamar, the young king of Sundari, embarks on a magical quest to atone for his mistake and to learn about honor, goodness, and the preciousness of life. Reprint.

Driven by his sense of "dharma," or honor, young King Tamar sets off on a perilous journey, with a significance greater than he can imagine, during which he meets talking animals, villainous and noble kings, demons, and the love of his life.

Scholars have scrutinized the diplomatic history of the great European states between 1871 and 1914 intensively and productively, but the review of internal developments within these states has not attracted as much attention. This is particularly true of Austria-Hungary if one excepts the large number of volumes, some of them first-rate, on the general subject of the "nationalities question." The full story of ministerial and legislative activity after 1867 awaits its delineators. At the University of Vienna some superior dissertations have illuminated certain aspects of Eduard von Taffe's personality and achievement as Austria's Minister-President between 1879 and 1893, but a full-scale appraisal has not appeared in any language. -- Preface.

In 1978, Nattalia Lea became the first woman to graduate from the University of British Columbia with a bio-resources engineering degree — an era when less than 0.5% of Canadian professional engineers were female. Then 26 years later, in 2004, after four engineering job terminations and a 16-year journalism stint, this working-class woman makes a comeback into Alberta's oil patch boardrooms. Lady with the Iron Ring is the heartwarming, witty and tell-all memoir of a woman with a mission who didn't recognize it as one at the time.

They've sailed on the Santa Maria, defended famous cities from Vikings and Mongols, and come face-to-face with some of the greatest figures in history. Now, at long last, Dak, Sera, and Riq travel back in time to the moment it all began. Their missio

In 1978, Nattalia Lea became the first woman to graduate from the University of British Columbia with a bio-resources engineering degree — an era when less than 0.5% of Canadian professional engineers were female. Lady with the Iron Ring is the heartwarming, witty and tell-all memoir of a woman with a mission who didn't recognize it as one at the time.

When engineering students in Canada are soon to graduate, the solemn —Ritual of the Calling of an Engineer,— penned by none other than Rudyard Kipling, charges them with their Obligation to high standards, humility, and ethics. Each budding engineer then receives an Iron Ring to be worn on

the small finger of the working hand as a reminder throughout their career. Through the story of the 1907 Quebec Bridge disaster, in which seventy-six men died, author Dan Levert teaches a powerful object lesson in what can happen when that Obligation is forgotten. Woven from transcripts of the inquiry into the collapse, the report of the commissioners, and other sources including the coroner's inquest, *On Cold Iron* plays out like a fast-paced thriller. Levert recounts the original 1850s proposals to bridge the St. Lawrence near Quebec City, through the design and construction of what was to be the longest clear span bridge of any kind in the world, to its shocking collapse during construction in August 1907. The missteps, poor policies, hubris, and wrong-headed actions begin to build like a death by a thousand cuts, until its inevitable and horrifying culmination. The meticulously researched and deftly delivered story of this terrible historical event makes fascinating reading for anyone, but even more, it is a powerful cautionary tale and a clarion call for the obligation and responsibility of an engineer.
