The retail industry is facing unprecedented challenges. Across all sectors and markets, retailers are shifting their business models and customer engagement strategies to ensure their survival. The rise of online shopping, and its primary player, Amazon, is at the heart of many of these changes and opportunities. Amazon explores the e-commerce giant's strategies, providing original insight at a time when the company is on the cusp of revolutionizing itself even further. Amazon's relentless dissatisfaction with the status quo is what makes it such an extraordinary retailer. This book explores whether Amazon has what it takes to become a credible grocery retailer, and as it transitions to bricks and mortar retailing, explores whether Amazon's stores can be as compelling as its online offering and if innovations such as voice technology, checkout-free stores and its Prime ecosystem will fundamentally change the way consumers shop. Written by industry leading retail analysts who have spent decades providing research-based analysis and opinion, Amazon analyzes the impact these initiatives will have on the wider retail sector and the lessons that can be learned from its unprecedented rise to dominance, as stores of the future become less about transactions and more about experiences.

The Valley of the Giants is set on the edge of Humboldt Bay in the fictional town of Sequoia, California. Starting in 1850s, with John Cardigan founding the logging company to build a life for him and his son Bryce, the novel follows the ups and downs of the Cardigan family and the on-going rivalry with Colonel Pennington over logging rights and other business matters. When Bryce Cardigan returns home from the college he finds out that his father's company is in trouble and that Pennington is pushing them out of business. He must try to save the company and screw Colonel Pennington, while juggling a secret relationship with Shirley, Pennington's niece.

How Strategy Works in an Interconnected, Automated World Leaders already know that the classic approach to strategy--analyze, plan, execute--is losing relevance. But they don't yet know what replaces it. As everyone and everything becomes more interconnected and digitized, how do you operate, compete, and win? Ming Zeng, the former Chief of Staff and strategy adviser to Alibaba Group's founder Jack Ma, explains how the latest technological developments, such as artificial intelligence, machine learning, the mobile internet, and cloud computing are redefining how value is created. Written especially for those outside the technology industry or the startup arena, this book introduces a simple, overarching framework to guide strategy formulation and execution in this data-rich and highly interactive environment. Revealing the revolutionary practices that he and his team have developed at Alibaba, Zeng shows how to: Automate decisions through machine learning Create products informed by real-time data from customers Determine the right strategic positioning to maximize value from platforms and suppliers Repurpose your organization to further human insight and enable creativity Lead your company's transformation into a smart business With insights into the strategies and tools used by leaders at Alibaba and other companies such as Ruhan and Red Collar, in a variety of industries from furniture making to banking to custom tailoring, Smart Business outlines a radically new approach to strategy that can be applied everywhere.

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

The hospitality and tourism sector is an increasingly significant contributor to GDP worldwide, as well as a key source of employment in

developing regions. Drawing on contemporary research, this Handbook provides a provocative review of the major human resource challenges facing the hospitality and tourism sector today.

Marketing Management: An International Perspective brings together over twenty real-life case studies of marketing management issues faced by leading international companies from around the world. Including cases from America, Asia and Europe, this collection is an ideal supplement to both marketing management or international marketing courses at both undergraduate and MBA level. Written by professors at IMD, one of the leading international business schools with a reputation for writing top-quality cases, this text is an invaluable resource for students of business and marketing. Providing both text and cases, the book is supported by a Tutor's Guide, based on the authors' own teaching experience, which provides a roadmap and guidance on how to best use each case.

The 21st century has witnessed important changes in retail logistics. Supply chain managers are presented with key challenges as retailers have recognised the strategic role that supply chains play in cost reduction and customer service. The 4th edition of Logistics and Retail Management has been substantially updated to take account of these recent developments in retail logistics. Logistics and Retail Management provides the most up-to-date thinking in retail supply chain management, reflecting the changing needs of the global marketplace and the challenges faced by retailers in the 21st century. With contributions from acclaimed academics and practitioners, it covers global logistics, fashion logistics, e-logistics and green supply chains. The 4th edition features brand new chapters on supply chain management in international fashion and corporate social responsibility in the textile supply chain.

Shopper Marketing details how marketers can influence the buying decision in-store. The 35 contributors from top companies around the world have packed the book with practical advice on shopper needs and trends, retail environments, effective packaging and much more to equip product and brand managers, packaging experts, merchandising specialists and more with the tools they need to be successful in this field of sales promotion. The second edition of Shopper Marketing has been fully updated to include a new forward by marketing guru Philip Kotler and 12 new articles that reflect the current changes in the fast growing area, focusing specifically on the international scope, the online presence and the future of shopper marketing. New case studies from India, China, Brazil and Japan also add to the depth and breadth of the first edition.
