examples capture readers' attention by demonstrating how the material is relevant to their lives. Active learning is encouraged throughout. Each chapter includes an outline to guide students, key terms and definitions to help identify critical concepts, and exploration exercises to promote active thinking. Many chapters include measurement instruments that students can take and score themselves. A website for instructors features a test bank with multiple-choice and essay questions and Power Points for each chapter. This text distinguishes itself with: Its focus on family and friend relationships as well as romantic relationships. Its multidisciplinary perspective highlighting the contributions to the field from a wide array of disciplines. Its review of the relationship experiences of a variety of people (of different age groups and cultures; heterosexual and homosexual) and relationship types (dating, cohabiting, marriage, friendships, family relationships). Its focus on methodology and research design with an emphasis on how to interpret empirical findings and engage in the research process. Cutting-edge research on "cyber-flirting" and online relationship formation; the biochemical basis of love; communication and social support; bullying and peer aggression; obsession and relational stalking; sexual violence (and marital rape); and grief and bereavement. The book opens by examining the fundamental principles of relationship science along with the research methods commonly used. The uniquely social nature of humans is then explored including the impact relationships have on health and well-being. Part 2 focuses on relationship development—from attraction to initiation to development and maintenance as well as the factors that guide mate choice and marriage. The development of relationships in both friendships and romantic partnerships is explored. Part 3 examines the processes that shape our interpersonal experiences, including cognitive (thinking) and affective (feeling) processes, communicative and supportive processes, and the dynamics of love and sex. The book concludes with relationship challenges—rejection and betrayal; aggression and violence; conflict and loss; and therapeutic interventions. Intended as a text for courses in interpersonal/close relationships taught in psychology, communication, sociology, anthropology, human development, family studies, marriage and family therapy, and social work, practitioners interested in the latest research on personal relationships will also appreciate this engaging overview of the field.

Why do some marriages grow stronger in the face of conflict or stress while others dissolve? In this book, two pioneering researchers present a groundbreaking theory of how mutually responsive behaviors emerge—or fail to emerge—in relationships. Illustrating their findings through the vivid stories of four diverse couples, the authors explore how conscious considerations interact with unconscious impulses to foster trust and commitment. Compelling topics include why marriages have such different personalities and what makes partners truly compatible. Also discussed are implications of the model for helping couples sustain satisfying relationships and improve troubled ones.

This collection of essays represents a follow-up to the editors' 1994 publication, *The Dark Side of Interpersonal Communication*. In the preface to that collection of essays, they argued that "To fully understand how people function effectively requires us to consider how individuals cope with social interaction that is difficult, problematic, challenging, distressing, and disruptive." In this companion volume, the focus expands from social interaction to close relationships. Aside from the inherent need to investigate the bad as well as the good of interpersonal relationships, the editors and

their colleagues simply find the dark side metaphor to be intellectually arousing. It stimulates investigation of important yet often neglected phenomena, and it especially encourages consideration of the hidden and forbidden, and the paradoxical and ironic elements of human relating. This volume assembles the cutting-edge work of first rate scholars from the ranks of communication, psychology, sociology, and cognate disciplines. As in the previous text, the subject matter and stylistic approaches are diverse, reflecting the broad and interdisciplinary domain that is the dark side of human affairs. The selection of topics is somewhat selective, reflecting only a sample of emerging scholarship in the interdisciplinary study of relationships. These internationally recognized scholars examine various topics related to the dark side, including fatal attractions, jealousy and envy, misunderstanding, gossip, conflict, codependence, sexual coercion, stalking, relationship termination, unrequited love, and mental health problems in relationships. Some chapters present original data and models, whereas others reconfigure the way in which the understandings of relationships can be better understood. In addition, the bookend chapters examine the ideology, nature, and problems of dark side scholarship. Collectively, the scholarly journeys made in this volume are intended to illustrate the complexities--both moral and functional--involved in close relationship processes. The intent is neither to valorize nor demonize the darker aspects of close relationships, but rather to emphasize their importance to the day-to-day "doing" of relationships. Only by accepting such processes as integral to relationships can their role be fully understood.

An outline of how power, an inherent feature of social interactions, operates and affects close relationships.

The first book to give an integrated theoretical framework for understanding the complexities of health and illness in close relationships.

Surveying the many forms of non-possessive intimate relationships, this book explains how these alternative lifestyle arrangements work, psychologically, and describes the benefits and risks for those involved within contemporary contexts such as swinging, threesomes, polyamory, and recreational sex clubs. • Describes a relatively new form of intimate relationship that is not well known to most people yet is intriguing to nearly all • Offers potential erotic options to couples struggling with diminishing passion • Suggests psychological insights as to what makes nontraditional relationships work • Engages readers with appropriate humor to better illustrate the concepts and theories regarding non-possessive intimate relationships

Given the importance of close relationships in all facets of human life, it is no surprise that research on relationship processes is multidisciplinary and divergent in methodology. Such diversity in the study of close relationships should allow for a more detailed and comprehensive understanding of relationship processes, but researchers in different fields have yet to integrate their findings into a deeper, more holistic model of close relationship functioning. This book brings together different perspectives on close relationships to explore how such relationships develop, function, and interact across a variety of contexts. Prominent scholars contribute theory and empirical research rooted in developmental, social, and cross-cultural psychology, as well as evolutionary science, individual differences, and

psychophysiology. Both early and adult relationships are examined, along with parent-child relationships. This excellent resource will be well received by researchers and students in the social sciences who are interested in a broader, more collaborative approach to relationship science.

Nonverbal Communication in Close Relationships provides a synthesis of research on nonverbal communication as it applies to interpersonal interaction, focusing on the close relationships of friends, family, and romantic partners. Authors Laura K. Guerrero and Kory Floyd support the premise that nonverbal communication is a product of biology, social learning, and relational context. They overview six prominent nonverbal theories and show how each is related to bio-evolutionary or sociocultural perspectives. Their work focuses on various functions of nonverbal communication, emphasizing those that are most relevant to the initiation, maintenance, and dissolution of close relationships. Throughout the book, Guerrero and Floyd highlight areas where research is either contradictory or inconclusive, hoping that in the years to come scholars will have a clearer understanding of these issues. The volume concludes with a discussion of practical implications that emerge from the scholarly literature on nonverbal communication in relationships – an essential component for understanding relationships in the real world. *Nonverbal Communication in Close Relationships* makes an important contribution to the development of our understanding not only of relationship processes but also of the specific workings of nonverbal communication. It will serve as a springboard for asking new questions and advancing new theories about nonverbal communication. It is intended for scholars and advanced students in personal relationship study, social psychology, interpersonal communication, nonverbal communication, family studies, and family communication. It will also be a helpful resource for researchers, clinicians, and couples searching for a better understanding of the complicated roles that nonverbal cues play in relationships.
