Type of Loop Structure. There are 3 types of loop structures in VBA, they are: For Loop. Do While Loop. Do Until Loop. Now, let's get to know each loop. 1. For Loop. The For Loop is the most commonly used loop type, you can write a loop that will be executed a specific number of times.

~~Loop Structure in Microsoft Excel Visual Basic - My ...~~

Visual Basic loop structures allow you to run one or more lines of code repetitively. You can repeat the statements in a loop structure until a condition is True, until a condition is False, a specified number of times, or once for each element in a collection. The following illustration shows a loop structure that runs a set of statements until a condition becomes true:
